SKILLS

- AI Agents Development
- Retrieval-Augmented Generation (RAG) Concepts
- Agent Orchestration & Workflow Design
- Fullstack Web Development
- REST API Development
- AI API Integration
- API Integration
- Go (Golang)
- Kafka
- PostgreSQL
- PHP
- SQL Server
- Next.js
- JavaScript
- MySQL

Suryana Dhuchri

FULLSTACK DEVELOPER, AI ENGINEER

ABOUT ME

AI Engineer / Fullstack Developer with strong experience in designing and building **AI-driven applications**, **intelligent agents**, and **scalable fullstack systems**. Proven ability to deliver **production-ready AI solutions** integrated with **modern frontend interfaces and high-performance backend services**.

Experienced in **frontend development using Next.js** and **backend development using Go (Golang) and JavaScript**, building **secure, scalable REST APIs** and responsive web applications. Skilled in implementing **AI workflows** for automation, data processing, and decision support within real-world systems.

Strong background in **system integration, software architecture, and computer networking**, enabling **end-to-end solution development** from user interface to backend services and infrastructure.

Currently focused on contributing as an **AI Engineer**, with hands-on experience building **intelligent agents and AI-powered systems** while leveraging fullstack expertise to deliver complete, user-ready products.

WORK EXPERIENCE

Fullstack Developer
PT Bank BCA Syariah / DKI Jakarta / Nov 2018 - Present

Responsible for delivering multiple software projects based on defined user requirements and delivery timelines using the **Scrum development process**. Actively involved in the **full software development lifecycle (SDLC)**, including requirement analysis, system design, development, testing, deployment, and ongoing maintenance.

Implemented and enforced **software development best practices** and standardized procedures to ensure **code quality, scalability, maintainability, and system reliability** across projects.

Designed, developed, and enhanced **system integrations** within existing enterprise applications, improving **performance, functionality, and cross-platform interoperability** through robust API and backend solutions.

EDUCATION

High school diploma
CCIT Fakultas Teknik Universitas Indonesia / Depok / 2016

Bachelor of Technology
STTI NIIT I-Tech / Jakarta / 2018

COURSES

HSM Training
PT Bank BCA Syariah / Feb 2021

Scrum Workshop
PT Bank BCA Syariah / Nov 2021

AWS Secure Cloud Essentials
PT Bank BCA Syariah / Dec 2021

Thought Machine Vault Fundamentals Training
PT Bank BCA Syariah / Feb 2022

Traning Robotic Process Automation Solution
PT Bank BCA Syariah / Dec 2022

Github Copilot
Jakarta / Nov 2025 - Nov 2025
